

STEM Prep

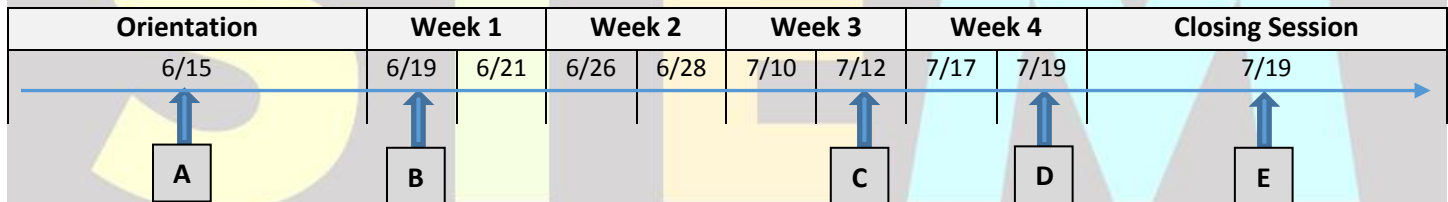

Preparing Students for College-Level STEM Courses

Supported by generous funding from the National Science Foundation, STEM Prep is an academic enrichment program for under-represented minority (URM) current CPCC students and high school 11th and 12th graders that are interested in pursuing bachelor's degrees in science, technology, engineering or mathematics disciplines. This 4-week, summer program is held on CPCC's Central campus. Participants are enrolled in non-credit courses that provide them with project-based experiences. Upon completion, participants of STEM Prep will:

- Gain increased familiarity with current practices in STEM fields
- Illustrate preparedness for a successful transition into STEM studies at the college level
- Participate in a coordinated exploration of careers in their targeted STEM focus area

All STEM Prep students will receive a personalized math enrichment plan that is designed to prepare them for college-level mathematics and will participate in lab-based activities in their choice of science, technology or engineering content areas.

Summer 2017 Timeline:

A	Jun. 15, 2017	Orientation
B	Jun. 19, 2017	First Day of Instruction
C	Jul. 12, 2017	Last Day of Instruction
D	Jul. 17, 2017	Begin Presentation Prep
